PA&E Exhibiting at RadarCon 2009 in Pasadena

Event Sponsored by IEEE Los Angeles Council and the IEEE Coastal Los Angeles Section

Wenatchee, WA – April 15, 2009 – PA&E will be highlighting its hermetic interconnect, electronic packaging and EMI filter product lines at this year's RadarCon 2009 conference, held May 4-8 at the new Pasadena Convention Center in Pasadena, CA. PA&E application engineers will be available in Booth 17 throughout the show to discuss electronic component engineering challenges with attendees and to answer questions about the company's products and integrated manufacturing capabilities.

According to show organizers, the 2009 conference theme: "Radar: From Science to Systems" expands the radar technology and engineering focus of previous conferences in this series to include and emphasize scientific or observational requirements and phenomenology that engender the systems that we in the radar community develop. This year's technical program will include sessions on a variety of topics including: RF Systems and Subcomponents; Antenna Technology, Waveform Design/Analysis and more.

"We're excited about this show in the Los Angeles area," said Tony Meade, one of the PA&E application engineers who will be attending this year's event. "We currently manufacture a range of products for many of the leading radar companies in the area so I'm looking forward to reconnecting with those organizations as well as using this opportunity to introduce PA&E's unique capabilities to companies we haven't done business with yet."

The exhibit hall will be open on May 5 and 6 from 8:00 am to 5:00 pm and on Thursday, May 7 from 8 am to 4 pm. Those interested in registering for this event should visit the RadarCon 2009 site at <http://www.radarcon09.org> .

For more information about PA&E, or to learn more about the company's interconnect products, [EMI filters](#), integrated [electronic packaging](#) and [explosive metal bonding](#) capabilities, contact PA&E at 509-664-8000 or visit us at <http://www.pacaero.com>.

PA&E, Inc. is an integrated manufacturing company, specializing in technically demanding ceramic and metal components and assemblies, hermetic connectors and advanced micro-electronic hermetic packaging for global leaders in the defense, space, medical and commercial industries. PA&E is ISO 9001:2000/AS9100 Rev B certified and NADCAP compliant.
